

ENVIRONMENTAL POLICY

Zetmar Commodities & International Trading Co. Ltd. is a major supplier of steel, aluminium, wooden products, insulation materials to various industries. The company is committed to achieving the highest environmental and sustainability industry standards.

Zetmar Commodities & International Trading Co. Ltd. with its management team and all employees are committed to:

- **Maximising the efficient use of energy and water.**

We reduce the impact of our emissions to water and air and continue to improve local air quality in the areas surrounding our operations. We prefer to work with producers who uses water efficiently in their operations, optimises the use of abstracted water and reduce where possible. We prefer to work with producers who use energy efficiently in the production, reduce fossil fuel consumption and maximise use of works gases arising in the process.

- **Reducing the impact of travel and transport.**

We recognise the social and environmental impact of transportation and continually reduce the associated impact of moving materials, products and people. We will continue to work closely with our logistics partners, ensuring best practice principles are adopted and implemented with the identification of significant environmental impacts and mitigations.

- **Minimising waste products from all processes.**

We minimise waste, improve recycling and re-use of by-products and, where appropriate, divert waste from landfill or incineration without energy recovery in accordance with the waste hierarchy.

- **Promoting responsible sourcing, product stewardship and life cycle thinking**

We monitor and control the use of energy and raw materials to optimise consumption, and maintain life cycle analysis of products as required by the market and use of recycled content in our all processes.

- **Conserving biodiversity and ecosystem**

We aim to conserve and/or where practicable enhance biodiversity on site, working in partnership with nature conservation organisations to improve biodiversity in the surrounding area.

- **Maintaining continual improvement in environmental performance.**

We are committed to continuous improvement, and will set objectives and targets on an annual basis and review to evaluate performance against those targets, to achieve its environmental objectives in order to minimise the environmental impacts of the organisation.

- **Actively engaging our local communities**

We actively engage with communities near our sites, allowing us to better understand and address any concerns. This proactive engagement aids our understanding of any localised environmental issues that may arise from our operations.
